

VECKTA is the market platform that delivers full turnkey microgrid design and implementation solutions. Offering 10x improvements over the status quo, VECKTA empowers large energy users to assess, finance, procure, and deploy customized onsite microgrid systems.

- One-stop marketplace platform
- Customized energy systems
- Technology-agnostic solutions
- User-friendly buying experience
- Procurement and Contracting
- Cost certainty & sustainability

Opportunity

Microgrid/ Distributed Energy System (DES) market demand is accelerating exponentially.

Businesses need DES to stay competitive, reduce carbon emissions, and secure their energy future.

Problem

DES are complex to design, finance and build; industry is stuck in analog mode with slow, expensive deal flow and paper-based contracting.

Market participants lack a coordinated, auditable marketplace with built-in engineering tools.

Solution

VECKTA is the first and only Energy Transition Market Platform, exclusively powered by the world's leading Distributed Energy System design software (XENDEE).

VECKTA models all customer requirements—technical, physical, financial and contractual—to empower and integrate the DES value chain to design, optimize, finance and build DES solutions at scale.

- Industry-defining analysis toolkit reduces feasibility study costs by 90%, providing a customized plan
- Data-driven market platform matches project needs with vetted partners
- Auditable procurement and contracting ensures accountability and aligned outcomes

Company Info

Name: VECKTA Inc.

Year of incorporation: 2019

State of incorporation: Delaware

Country of origin: USA

Location: San Diego, USA

Founding team:

- CEO & Co-Founder: [Gareth Evans](#)
- CSO & Co-Founder: [Tristan Jackson](#)

Employees: 25

Summary: VECKTA is the Energy Transition Market Platform. The VECKTA platform integrates the world's most advanced energy system engineering tools with an integrated end-to-end marketplace to seamlessly bring together all the stakeholders required to assess, design, supply, build, and finance customized distributed energy and microgrid systems for commercial and industrial businesses. VECKTA empowers businesses and communities to quickly and easily baseline their energy situation today, customize a solution specific to their needs (cost, reliability and/or emissions) and then seamlessly engage and contract the best equipment, services, and capital providers in the market to finance, deploy and operate it sustainably and profitably.

Product: Marketplace platform to simplify the microgrid projects process through supporting technical, physical, financial and contractual requirements to design, optimize, and deploy distributed energy solutions.
